Kathy,

Just to let you know that I've not heard from an installer. The gate still hits the electric meter every time that the gate is opened.

Regards,

Greg Enz

I'll let the installers know.

Have a great day!  
Kathy

Hi Kathy,

We're developing an issue with the gate.

When the gate install was finished, the gate barely cleared the electric meter when it was opened and closed. Now it is very slightly hitting the meter. I'm afraid that if the gate continues to "sag" it will either crack the electric meter cover or not be openable.

Could you have one of your guys swing by the house to take a look at the gate.

Thanks,

Greg Enz

He's just advised he's heading there tomorrow after they finish their install.

Have a great day and Happy Holidays!

Kathy

Importance: High

Kathy,

Just wondering if you received the following email as I haven't yet received any response.

I'd like to resolve this gate issue and get you paid.

Regards,

Greg Enz

Subject: Gate Issue

Importance: High

Hi Kathy,

Your guys installed the gate this morning. I have a problem with the gate. It appears not to be square vertically. Please see attached photos. Gate 1 shows the gate closed. Gate 2 shows a bubble level on the gate. Both side posts are vertical. The gate starts out at the hinge side vertical, but ends up progressively not vertical as I move the level from the hinge side to the latch side. It appears that the gate frame may be twisted.

I really don't know the issue, but am unhappy that the installers left the gate so obviously out-of-square.

Could you please have your guys take care of the issue.

Thanks in advance.

Greg Enz
